Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given; occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue No. 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité.
Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLE 5. Industrial Product Price Indexes: Net Outflows by Major Group(1)

TABLEAU 5. Indices des prix des produits industriels: sorties nettes par groupes principaux d'industries(1)

1981 = 100 1981 = 100

	Month – Mois												Annual average
	Jan. – Janv.	Feb. – Fév.	March – Mars	April – Avril	May – Mai	June – Juin	July – Juill.	Aug. – Août	Sept.	Oct.	Nov.	Déc.	Moyenne annuelle
Indexes of net outflows of total manufacturing – Indices des sorties nettes de l'ensemble des industries manufacturières D 613800													
Indexes of net outflows of food and beverage industries – Indices des sorties nettes des industries des aliments et boissons D 613801													
Indexes of net outflows of tobacco products industries – Indices des sorties nettes des industries des produits du tabac D 613802													
Indexes of net outflows of rubber and plastics products industries – Indices des sorties nettes des industries du caoutchouc et des produits en matière plastique D 613803													
Indexes of net outflows of leather industries – Indices des sorties nettes des industries du cuir D 613804													
Indexes of net outflows of textile industries – Indices des sorties nettes des industries textiles D 613805													
Indexes of net outflows of knitting mills – Indices des sorties nettes des bonneteries D 613806	Not available at this time. Non disponible pour le moment.												
Indexes of net outflows of clothing industries – Indices des sorties nettes des industries du vêtement D 613807													
Indexes of net outflows of wood industries – Indices des sorties nettes des industries du bois D 613808													
Indexes of net outflows of furniture and fixture industries – Indices des sorties nettes des industries du meuble et des articles d'ameublement D 613809													
Indexes of net outflows of paper and allied industries – Indices des sorties nettes des industries du papier et activités connexes D 613810													
Indexes of net outflows of printing, publishing and allied industries – Indices des sorties nettes des industries d'imprimerie, édition et activités connexes D 613811													
Indexes of net outflows of primary metal industries – Indices des sorties nettes des industries de la première transformation des métaux D 613812													
Indexes of net outflows of metal fabricating industries (excl. machinery and transportation equipment) – Indices des sorties nettes des industries de la fabr. des prod. en métal (sauf mach. et mat. de transp.) D 613813													

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

TABLEAU 5. Indices des prix des produits industriels: sorties nettes par groupes principaux d'industries(1)

1981 = 100 1981 = 100

	Month Mois												Annual average
	Jan. Janv.	Feb. Fev.	March – Mars	April – Avril	May – Mai	June – Juin	July – Juill.	Aug. – Août	Sept.	Oct.	Nov.	Déc.	Moyenne annuelle
Indexes of net outflows of machinery industries (except electrical) – Indices des sorties nettes des industries de la fabrication de machines (sauf électriques) D 613814													
Indexes of net outflows of transportation equipment industries – Indices des sorties nettes des industries de la fabrication de matériel de transport D 613815													
Indexes of net outflows of electrical products industries – Indices des sorteis nettes des industries de la fabrication de produits électriques D 613816													
Indexes of net outflows of non-metallic mineral products industries – Indices des sorties nettes des industries de la fabrication de produits minéraux non métalliques D 613817	Not available at this time. Non disponible pour le moment.												
Indexes of net outflows of petroleum and coal products industries – Indices des sorties nettes des industries de la fabrication de produits du pétrole et du charbon D 613818													
Indexes of net outflows of chemical and chemical products industries – Indices des sorties nettes des industries chimiques D 613819													
Indexes of net outflows of miscellaneous manufacturing industries – Indices des sorties nettes des industries manufacturières diverses D 613820													

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) Net outflow indexes are calculated for the major groups described by the 1970 Standard Industrial Classification. The 1980 SIC is not used because the Input-Output tables are not yet available on the updated classification. — Les indices des sorties nettes sont calculés pour les groupes principaux dérivés de la Classification des activités économiques de 1970. La classification type des industries de 1980 n'est pas utilisée en raison de l'indisponibilité des tableaux des Entrées-Sorties suivant la nouvelle classification.

TABLE 6. Electric Power Selling Price Indexes, for Non-residential Customers

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1981 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1981 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported most often for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about 6 weeks after the reference period in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about three weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,000 producers for goods sold which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is made of the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct surveys and these account for about 85% of the value of manufacturing output in 1981. The price movement for the remaining

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1981 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1981. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés le plus souvent pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ six semaines après la fin de la période de référence dans le *Quotidien* (n^{O} 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n^{O} 62-011 au catalogue, *Indice des prix de l'industrie,* paraît trois semaines environ après le communiqué dans le Quotidien. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,000 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'enquêtes directes, qui couvrent environ 85% de la valeur de la production manufacturière en 1981. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir

600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1981 Input/Output table which, in turn, is derived from 1981 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in establishments of production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically as required in December of each year, while weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

Historical Data

The 1981 = 100 industry aggregation of elemental commodities is directly relatable to the 1971 = 100 Industry Selling Price Indexes which is available from 1956 to 1985. In a note to users provided with the September 1985 issue of Catalogue 62-011 *Industry Price Indexes* the nearest equivalent series for both the 1971 and the 1981 based series were identified and the degree of compatability of the two series was stated. Link factors,

de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activité proviennent de la matrice "production" du tableau d'entrées-sorties de 1981, laquelle à son tour est établie à partir des valeurs de 1981 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux successivement plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^{I}$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$ signifie la sommation de tous les éléments i dans l'agrégat défini.

Données historiques

L'agrégation par industries basée 1981 = 100 des produits élémentaires se rattache directement aux indices des prix de vente dans l'industrie 1971 = 100, qui existent pour la période 1956-1985. La note aux utilisateurs parue dans le numéro de septembre 1985 de la publication n° 62-011 au catalogue *Indices des prix de l'industrie* identifiait la série équivalente la plus proche pour les séries basées sur 1971 et 1981, ainsi que le degré de comparabilité. Les facteurs de raccordement, calculés à partir de

derived from the relationship of the two series in December 1985, will also be published in the January issue of Catalogue 62-011. These link factors will not be revised. Users can obtain a continuous series on a 1971 = 100 base by consulting the July 1984 and the December 1985 issues of Catalogue 62-011 or by retrieving the data from CANSIM.

Reference Document

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described as are index calculation and aggregation procedures. The relationship of the new series to its Industry Selling Price predecessor is given. Comments on index use are provided.

In the tables will be found weighting patterns for both aggregations of commodities and commodities into commodity groupings. Descriptions of the characteristics of the elemental indexes are provided. A listing is provided of nearest equivalent series in the 1981 = 100 series as they relate to the 1971 = 100 Industry Selling Price Indexes.

A glossary of terms is also provided.

la relation des deux séries en décembre 1985, paraîtront également dans le numéro de janvier de la publication n^{O} 62-011 au catalogue. Ces facteurs ne seront pas révisés. Les utilisateurs peuvent obtenir une série continue sur la base 1971 = 100 en consultant le numéro de juillet 1984 et celui de décembre 1985 de la publication n^{O} 62-011 au catalogue, ou en extrayant les données de CANSIM.

Document de référence

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices. Les relations entre la nouvelle série et l'ancienne série des prix de vente dans l'industrie qui l'avait précédée s'y trouvent également. La publication contient des commentaires sur l'utilisation des indices.

Les tableaux contiennent les schémas de pondération à la fois pour les agrégats de produits et de produits en groupes. Y figurent également une description des caractéristiques des indices élémentaires ainsi qu'une liste des séries équivalentes les plus proches de la série 1981 = 100, dans la mesure où elles se rapportent aux Indices des prix de vente dans l'industrie 1971 = 100.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1981 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1981 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 1980.

These indexes are, to a large extent, a continuation of the previously published Raw Materials Price Indexes, 1977 = 100. The new, 1981 = 100 indexes can be linked with their equivalents in the 1977 = 100 series using the link factors which were released in the January 1986 issue and repeated in the February and March issues of this publication. Apart from the change in time and weight base, there have been some minor changes in the structure and methodology. Thus, the previous major group Textiles has been discontinued and the commodities forming it re-distributed: cotton is now a part of vegetable products and wool is a part of animal and animal products. Man-made fabrics, which did not satisfy the definition of raw materials, have been excluded from the revised index. At the same time, both the commodity samples and the samples of respondents have been revised and updated to give more reliable estimates of price movement. As a consequence some additional commodity detail is now available.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at

INDICES DES PRIX DES MATIÈRES BRUTES (1981 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matière brute" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1981, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 1980 de CANSIM.

Ces indices constituent, dans une large mesure, la suite des Indices des prix des matières brutes, 1977 = 100, précédemment publiés. Les nouvelles séries basées 1981 = 100 peuvent être raccordées à leurs séries équivalentes basées 1977 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de janvier 1986, et répétés dans les numéros de février et de mars 1986, de la présente publication. Outre le changement dans la période de pondération et de référence, de légères modifications ont été apportées à la structure et à la méthodologie. Ainsi, l'ancienne composante principale nommée Matières textiles a été dissoute, et les produits qui en faisaient partie ont été reclassifiés comme suit: le coton se retrouve maintenant avec les substances végétales, et la laine, avec les animaux et substances animales. Ne satisfaisant pas à la définition de matières brutes, les fibres synthétiques ont été exclues du nouvel indice. Par ailleurs, les échantillons à la fois des produits et des répondants ont été révisés et mis à jour afin d'obtenir des estimations plus fiables des mouvements de prix. En conséquence, plus de détails sont maintenant disponibles pour certains produits.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix d'autres sources bien connues soient utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont

the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1981 Input/Output tables which provide values at purchasers prices of commodities purchased as intermeditate inputs. These weights are shown in the accompanying table.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1981, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires. Ces pondérations sont présentées au tableau ci-joint.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1981;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1981;

$P_{t/o}^{i}$ est l'indice de prix pour l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

$\sum_i$ indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in 1981 or a more recent year. In a few instances where data are not available, the price quotations are equally weighted.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone 613-990-9607.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché en 1981 ou pour une année plus récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6, ou téléphonez au 613-990-9607.

RAW MATERIALS PRICE INDEX, 1981 = 100, WEIGHTING DIAGRAM

INDICE DES PRIX DES MATIÈRES BRUTES, 1981 = 100, SCHÉMA DE PONDÉRATION

Index - Indice	Weights - Pondérations	
	Total Ensemble	Major group Groupe majeur
	percentage - pourcentage	
Raw materials - Total - Ensemble des matières brutes	100.0	
Total excluding mineral fuels - Ensemble sauf combustibles minéraux	54.74	
Vegetable products – Substances végétales	**10.40**	**100.0**
Fresh fruits - Fruits frais	0.49	4.79
Grains - Céréales	3.47	33.39
Oilseeds - Oléagineux	1.56	15.01
Fresh vegetables - Légumes frais	1.07	10.37
Tobacco, raw - Tabac, en feuilles	0.76	7.35
Sugar, unrefined - Sucre, non raffiné	1.23	11.85
Natural rubber & allied gums - Caoutchouc et gommes analogues, naturels	0.28	2.70
Cocoa, coffee & tea - Cacao, café et thé	1.02	9.83
Hay & forage - Foin et fourage	0.03	0.37
Vegetable textile fibres - Fibres textiles d'origine végétale	0.44	4.28
Animal & animal products – Animaux et substances animales	**20.44**	**100.0**
Furs, hides & skins - Fourrures, cuirs & peaux	0.80	3.93
Cattle and calves - Bovins & veaux	6.68	32.69
Sheep & lambs - Moutons et agneaux	0.03	0.19
Hogs - Swine, nes. - Porcs destinés à l'abbatage	3.59	17.57
Poultry - Volaille	1.65	8.10
Milk, whole, unprocessed - Lait, entier, non transformé	5.69	27.83
Eggs in the shell - Oeufs en coquille	0.22	1.11
Fish - Poisson	1.63	8.01
Animal textile fibres - Fibres textiles d'origine animale	0.10	0.53
Wood – Bois	**8.07**	**100.0**
Logs and bolts - Billes et billots	4.93	61.06
Pulpwood - Bois à pâte	3.14	38.93
Ferrous materials – Matières ferreuses	**2.30**	**100.0**
Iron ore - Minerais de fer	1.53	66.17
Iron & steel scrap - Déchets de fer et d'acier	0.78	33.83
Non ferrous metals – Métaux non ferreux	**11.13**	**100.0**
Copper concentrates - Concentrés de cuivre	2.83	25.43
Lead concentrates - Concentrés de plomb	0.91	8.25
Nickel concentrates - Concentrés de nickel	0.42	3.85
Zinc concentrates - Concentrés de zinc	0.63	5.74
Radio-actives concentrates - Concentrés radio-actifs	1.18	10.68
Precious metals - Métaux précieux	1.92	17.27
Other base metals - Autres métaux non ferreux	2.65	23.83
Non-ferrous scrap - Déchets de métaux non ferreux	0.54	4.91
Non-metallic minerals – Minéraux non métalliques	**2.38**	**100.0**
Sulphur - Soufre	0.16	6.78
Asbestos fibres - Fibres d'amiante	0.03	1.45
Clays and other crude refractory - Argile & autres matières réfractaires brutes	0.21	8.82
Sand and gravel - Sable et gravier	0.41	17.36
Stone - Pierre	0.68	28.70
Other crude minerals - Autres minéraux bruts	0.87	36.85
Mineral fuels – Combustibles minéraux	**45.25**	**100.0**
Coal (thermal) - Charbon (thermique)	3.48	7.70
Crude mineral oil - Huiles minérales brutes	38.38	84.80
Natural gas - Gaz naturel	3.39	7.49

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1981 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1981 as a time reference base and the weights used are 1981 company revenues from sales of electricty, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the Industry Product Price Indexes, 1981 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 1979. Indexes for the current year and the previous year are subject to revision.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1981 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnés d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1981, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1981, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1981 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 1979. Les indices de la présente année et de l'année précédente sont sujets à révision.

Every week

The numbers that make decisions

The data that highlight national economic trends

Infomat is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

Infomat, Catalogue No. 11-002E (weekly), is available for $2.00 per copy/$100.00 annually (in Canada); $3.00 per copy/$150.00 annually (elsewhere), from:

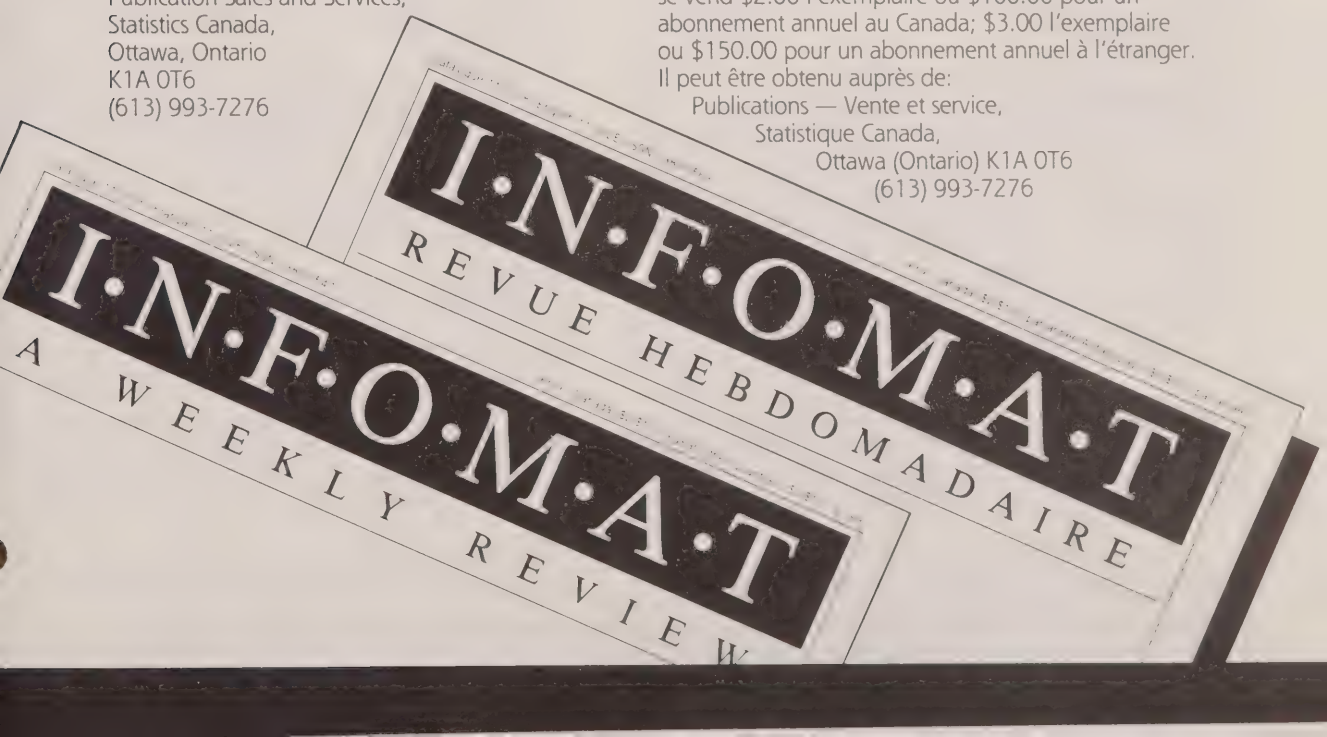
Toutes les semaines



Les chiffres qui font les décisions

Les données illustrant les tendances de l'économie canadienne

Infomat est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

Infomat, n° 11-002F au catalogue (hebdomadaire), se vend $2.00 l'exemplaire ou $100.00 pour un abonnement annuel au Canada; $3.00 l'exemplaire ou $150.00 pour un abonnement annuel à l'étranger. Il peut être obtenu auprès de:

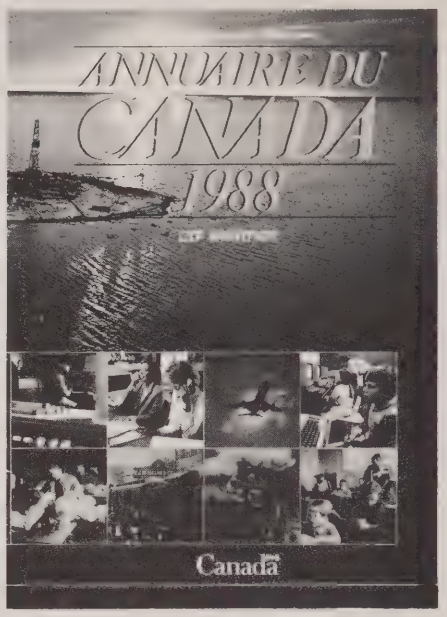
Canada

A JOURNEY OF 1000 MILES BEGINS WITH A SINGLE STEP



The *Canada Year Book* recorded Canada's first steps in 1867. It's still the only book that gives you the most complete, up-to-date facts on every aspect of Canada's growth as a nation.

Physical setting * Demography * Health * Education * Employment and incomes * Social security * Housing and construction * Forests, fish and furs * Agriculture * Mines and minerals * Energy * Science and technology * Transportation * Communications * Cultural activities and leisure * Manufacturing * Merchandising and services * Banking, finance and insurance * Judicial System * External relations, trade and defence * Government * Government finance * Review of the economy

Sold in Bookstores and also available by calling Statistics Canada toll-free at 1-800-267-6677 or by completing the order coupon included in this publication.

$49.95 plus shipping and handling ($54 inclusive in Canada, $70 other countries); Catalogue number 11-402E.

Information can also be obtained by contacting your Regional Reference Centre.

TOUT LE PAYS, D'UNE COUVERTURE À L'AUTRE

Déjà au siècle dernier, les premiers pas de la nation étaient consignés dans l'*Annuaire du Canada* . Aujourd'hui, l'*Annuaire du Canada* témoigne toujours avec précision et exhaustivité des multiples facettes de l'évolution du pays.

Physiographie * Démographie * Santé * Éducation * Emploi et revenu * Sécurité sociale * Logement et construction * Pêches et fourrures * Agriculture * Mines et minéraux * Énergie * Sciences et technologie * Transports * Communications * Activités culturelles et loisirs * Industries manufacturières * Commerce et services * Banques, finances et assurances * Gouvernement * Système judiciaire * Relations extérieures, commerce et défense * Finances publiques * Revue de l'économie

Disponible en librairie, en téléphonant à Statistique Canada au numéro sans frais 1-800-267-6677 ou en remplissant le bon de commande qui figure dans la présente publication.

$49.95 frais de port et de manutention en sus ($54 au Canada, $70 à l'étranger); numéro 11-402F au répertoire.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Highlights

Industrial Product Price Index (IPPI)

Preliminary figures indicate that the Industrial Product Price Index (IPPI, 1981 = 100) rose 0.2% in October 1987. This monthly increase was primarily the result of price increases for primary metal products, motor vehicles, industrial chemicals, wood pulp and various paper products. However, price decreases for meats, softwood lumber and petroleum and coal products had a moderating effect on the overall index.

The year-to-year advance of the IPPI from October 1986 to October 1987 was 3.7%, a slightly lower rate than the average of 3.8% recorded in the previous three months. However, the IPPI rate of increase has accelerated to a significant extent recently, with growth for the 6 month period, from April 1987 to October 1987, reaching 2.6%, as compared to 1.1% for the period October 1986 to April 1987 and 0.5% from April 1986 to October 1986.

The price index for primary metal products advanced by 1.5% in October 1987, its eighth straight rise. The year-to-year advance was 9.4%. The increases of 5.8% in the aluminum products index, 2.6% in the copper products index and 3.7% in the ferrous and non-ferrous scrap metal index were the main factors in the monthly rise in the group index.

The motor vehicles price index rose by 1.9% in October 1987. However, the year-to-year advance was down 2.0%, with the indexes for passenger automobiles and trucks for export posting decreases of 3.1% and 3.4% respectively from October 1986. The monthly increase of 1.9% was mainly the result of increases of 2.2% in the index for passenger automobiles and of 2.2% in the index for trucks, which reflect initial estimates of price changes for 1988 models.

The price index for industrial chemicals advanced by 1.5% in October 1987, up 7.8% from October 1986. The price increases for organic industrial chemicals (1.2%) and for synthetic resins (3.1%) were the main contributors to the monthly movement of the group index.

The price index for paper and paper products rose by 0.9% in October 1987, up 7.4% from October 1986. The monthly gain was primarily the result of the 2.6% price increase for wood pulp. The index for wood pulp has risen an average of 5.3% in each quarter since the beginning of 1986. The monthly advance was also attributable to the 1.5% increase in the paper products index, which was largely the result of price increases of 3.5% for corrugated cartons and packaging, 2.7% for paper bags, 5.1% for non-treated converted paper and 3.3% for adhesive tape and gummed paper.

The price index for meat products declined by 1.4% in October 1987, to reach a level 0.3% lower than a year earlier. In October 1987, prices went down for a broad range of meats, notably chickens (-2.6%), beef and veal (-2.2%) and pork (-1.2%).

Preliminary estimates indicate that the price index for petroleum and coal products was down 1.0% in October 1987, mainly owing to the decrease in prices for motor gasoline. The annual advance in the index was 9.0%.

The price index for softwood lumber was down 2.1% in October 1987, a decrease of 3.3% from October 1986. Softwood lumber fell mainly in Quebec (-6.9%) and Ontario (-8.1%), owing to the decrease in spruce prices.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1981 = 100) s'est accru de 0.2% au mois d'octobre 1987. Cette hausse mensuelle fut en majeure partie attribuable aux augmentations de prix pour les produits métalliques primaires, les véhicules automobiles, les produits chimiques industriels de même que pour les pâtes de bois et divers produits du papier. Les baisses de prix pour les viandes, le bois résineux de construction et les produits du pétrole et du charbon ont cependant exercé un effet modérateur sur l'indice d'ensemble.

La progression annuelle de l'IPPI, d'octobre 1986 à octobre 1987, s'est établie à 3.7%, soit à un niveau légèrement inférieur à la moyenne de 3.8% oservée pour les trois derniers mois. Le rythme d'accroissement de l'IPPI s'est toutefois accéléré de façon significative au cours des derniers mois, la croissance pour les six mois allant d'avril 1987 à octobre 1987 atteignant 2.6%, comparativement à 1.1% pour la période octobre 1986 à avril 1987 et 0.5% pour la période avril 1986 à octobre 1986.

L'indice des prix des produits métalliques primaires a progressé de 1.5% au mois d'octobre 1987 pour enregistrer une huitième hausse mensuelle consécutive. La progression sur douze mois s'établit maintenant a 9.4%. Les augmentations de 5.8% de l'indice des produits de l'aluminium, de 2.6% de l'indice des produits du cuivre et de 3.7% de l'indice des déchets de métaux ferreux et non ferreux furent les principaux responsables de la progression mensuelle de l'indice du groupe.

L'indice des prix des véhicules automobiles s'est accru de 1.9% au mois d'octobre 1987. La variation sur douze mois s'inscrivait toutefois en baisse de 2.0%, les indices des automobiles et des camions pour l'exportation affichant des diminutions de 3.1% et de 3.4% respectivement par rapport à octobre 1986. La hausse mensuelle de 1.9% fut surtout attribuable aux augmentations de 2.2% de l'indice des automobiles et de 2.2% également de l'indice des camions, ces augmentations réflétant les premières estimations sur les changements de prix des modèles 1988.

L'indice des prix des produits chimiques industriels a augmenté de 1.5% en octobre 1987, en hausse de 7.8% par rapport à octobre 1986. La poussée des prix des produits chimiques industriels organiques (1.2%) et des résines synthétiques (3.1%) a largement contribué au mouvement mensuel de l'indice du groupe.

L'indice des prix du papier et des produits connexes a affiché un gain de 0.9% en octobre 1987, en hausse de 7.4% par rapport à octobre 1986. Le gain mensuel a d'abord résulte de la hausse de 2.6% des prix des pâtes de bois. L'indice des pâtes de bois s'est accru en moyenne de 5.3% au cours de chaque trimestre depuis le début de 1986. Le gain mensuel a également résulté de la hausse de 1.5% de l'indice des produits du papier, elle-même attribuable dans une large part aux augmentations de prix de 3.5% pour les boîtes et cartons en matières ondulées, de 2.7% pour les sacs en papier, de 5.1% pour les papiers transformes non-traités et de 3.3% pour le ruban adhésif et le papier gomme.

L'indice des prix des produits de la viande a diminué de 1.4% en octobre 1987, pour se retrouver a un niveau inférieur de 0.3% par rapport à octobre 1986. En octobre 1987, les prix de l'ensemble des viandes se sont repliés, notamment le poulet (-2.6%), le boeuf et le veau (-2.2%) et le porc (-1.2%).

D'après les premières estimations, l'indice des prix des produits du pétrole et du charbon s'est inscrit en baisse de 1.0% au mois d'octobre 1987, en raison principalement de la diminution des prix de l'essence a moteur. La progression annuelle de l'indice s'établit maintenant a 9.0%.

L'indice des prix du bois résineux de construction a enregistre une baisse de 2.1% en octobre 1987, en baisse de 3.3% par rapport à octobre 1986. Le bois résineux de construction a surtout diminue au Québec (-6.9%) et en Ontario (-8.1%) en raison de la baisse des prix de l'épinette.

Highlights

Raw Materials Price Index

Preliminary estimates show the Raw Materials Price Index (RMPI, 1981 = 100) decreased 1.5% between September and October to a level of 104.4. This monthly decrease was the result of an estimated 3.9% decrease for the mineral fuels component and a 2.0% decrease for the animals and animal products component. Over the year, the RMPI has increased 11.3%, down from the 13.7% year-over-year change posted in September and down from the peak 16.8% yearly change registered in August. Excluding the mineral fuels component, the RMPI increased 0.2% over the month and 6.8% over the year. Of the seven components making up the Raw Materials Price Index, five registered increases while the other two posted decreases from the previous month.

The mineral fuels component index was estimated to have decreased 3.9% in October to a level of 95.4. This was still 18.2% higher than a year ago. Once again, crude oil prices determined the movement of the component, decreasing an estimated 4.7% in October to a level 24.2% higher than in October 1986.

The animals and animal products component index declined 2.0% over the month to a level of 119.8. Over the year, this index was 2.7% higher. An 8.7% drop in prices for hogs was the most significant decrease within the component. An expansion in the number of hogs, both in Canada and the U.S., appears to be the main reason for the price decrease. Poultry prices dropped 2.7%, as chickens showed a 3.0% decline and turkeys decreased 1.9%. Cattle and calves were 2.2% lower in October, though these prices were still 5.7% higher than a year ago.

The index for non-ferrous metals increased 2.3% in October to a level 20.7% higher than a year earlier. Copper prices continued to strengthen, posting a 3.6% increase over the month. Over the year, copper has increased 30.5%. While little movement occurred in October, lead and nickel have shown large increases on a year-to-year basis. Lead was up 59.0% over the year and nickel has increased 23.7% since October 1986. "Other base metals" (an aggregation of molybdenum, titanium dioxide slag, tin and aluminum) increased 5.6% over the month to a level 26.6% higher than a year ago.

The wood component index was 1.6% higher in October than in September. Its level of 124.7 was 13.9% higher than a year earlier. Logs and bolts were up 1.9% over the month and 20.1% over the year. Pulpwood increased 1.1% in October to a level 4.3% higher than a year ago.

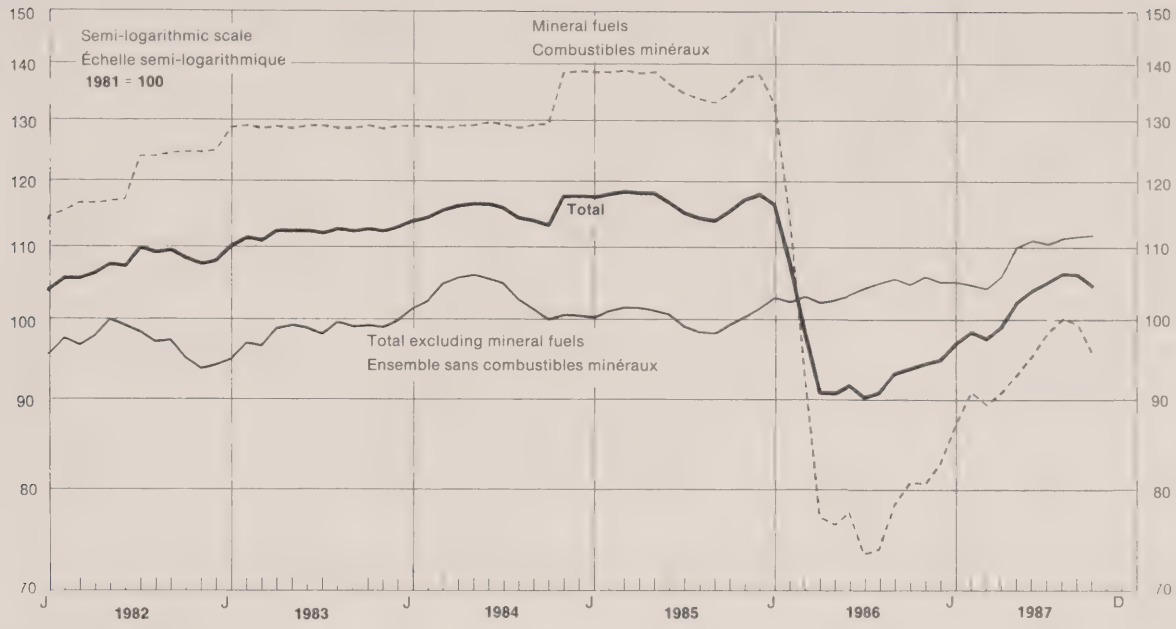
The index for the vegetable products component increased 2.2% in October to a level of 85.1. Despite this increase, the index was still 0.6% lower than in October 1986. Over the month, oilseeds rose 2.4%, as price increases were registered for rapeseed and flaxseed. A 12.2% jump in unrefined sugar prices placed this index at a level of 49.8. At this level, it was 19.4% higher than a year ago. In spite of a 5.4% increase for cocoa, coffee and tea, this index remained 30.5% below its October 1986 level.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1981 = 100) a diminué de 1.5% entre septembre et octobre pour s'établir au niveau de 104.4. Cette diminution mensuelle a résulté de la baisse estimée à 3.9% de la composante des combustibles minéraux et du recul de 2.0% de la composante des animaux et des substances animales. En un an, l'IPMB a augmenté de 11.3%, en baisse par rapport à la variation annuelle de 13.7% enregistrée en septembre et par rapport au sommet de 16.8% observée en août. En excluant la composante des combustibles minéraux, l'IPMB a progressé de 0.2% au cours du mois et de 6.8% au cours de l'année. Des sept composantes de l'indice des prix des matières brutes, cinq ont augmenté tandis que deux ont accusé des baisses par rapport au mois précédent.

Selon les premières estimations, l'indice de la composante des combustibles minéraux a diminué de 3.9% en octobre pour s'établir à 95.4. L'indice demurait néanmois en hausse de 18.2% par rapport à l'année dernière. Encore une fois, les prix des huiles minérales brutes contribuèrent largement au movement de la composante en enregistrant une diminution estimée à 4.7% en octobre, pour se retrouver à un niveau supérieur de 24.2% par rapport à octobre 1986.



L'indice de la composante des animaux et des substances animales s'est replié de 2.0% au cours du mois pour se situer au niveau de 119.8. L'indice s'est toutefois inscrit en hausse de 2.7% par rapport à l'année précédente. La baisse la plus significative à l'intérieur de la composante fut celle des prix des porcs (-8.7%). L'accroissement du nombre de porcs, à la fois au Canada et aux États-Unis, apparaît être la cause principale de cette baisse de prix. Les prix de la volaille se sont repliés de 2.7% en raison des baisses de 3.0% pour les poulets et de 1.9% pour les dindons. Les prix des bovins et des veaux ont diminué de 2.2% en octobre, mais se retrouvent néanmoins en hausse de 5.7% par rapport à l'année dernière.

L'indice des métaux non ferreux a augmenté de 2.3% en octobre pour atteindre un niveau de 20.7% supérieur à l'année dernière. Les prix du cuivre ont poursuivi leur ascension enprogressant de 3.6% au cours du mois. La majoration des prixdu cuivre en un an a atteint 30.5%. Bien qu'ils soient demeurés à peu près stables en octobre, le plomb et le nickel ont enregistré d'importantes variations sur une base annuelle. Le plomb était en hausse de 59.0% et le nickel, de 23.7%, par rapport à octobre 1986. Le groupe des "autres métaux non ferreux" (qui comprend le molybdène, le scorie de dioxide de titane, l'étain et l'aluminium) a augmenté de 5.6% au cours du mois pour atteindre un niveau dépassant de 26.6% celui d'un an plus tôt.

L'indice de la composante du bois s'est accru de 1.6% en octobre par rapport à septembre. Son niveau de 124.7 était supérieur de 13.9% à celui de l'année précédente. Les billes et billots ont augmenté de 1.9% au cours du mois et de 20.1% en un an. Le bois à pâte a progressé de 1.1% en octobre pour atteindre un niveau suérieur de 4.3% à celui de l'année dernière.

L'indice de la composante des substances végétales s'est accru de 2.2% en octobre pour s'établir au niveau de 85.1%. Malgré cet accroissement, l'indice demeurait en baisse de 0.6% par rapport à octobre 1986. Au cours du mois, les oléagineux ont augmentés de 2.4% en raison des hausses observées pour le colza et le lin. Un accroissement de 12.2% des prix du sucre non raffiné a porté cet indice à un niveau de 49.8, en hausse de 19.4% par rapport à octobre 1986. En dépit d'une hausse de 5.4% pour le cacao, le café et le thé, cet indice on demeuré inférieur de 30.4% par rapport à son niveau d'il y a un an.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given; occasionally these coverage measures are rounded to the nearest 5%, to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue No. 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité.
Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

1981 = 100

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.
(1) Net outflow indexes are calculated for the major groups described by the 1970 Standard Industrial Classification. The 1980 SIC is not used because the Input-Output tables are not yet available on the updated classification.
(1) Les indices des sorties nettes sont calculés pour les groupes principaux dérivés de la Classification des activités économiques de 1970. La classification type des industries de 1980 n'est pas utilisée en raison de l'indisponibilité des tableaux des Entrées-Sorties suivant la nouvelle classification.

TABLE 6. Electric Power Selling Price Indexes, for Non-residential Customers

TABLEAU 6. Indices des prix de vente de l'énergie électrique, pour les acheteurs non-résidentiels

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1981 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1981 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported most often for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about 6 weeks after the reference period in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about three weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,000 producers for goods sold which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is made of the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct surveys and these account for about 85% of the value of manufacturing output in 1981. The price movement for the remaining

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1981 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1981. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés le plus souvent pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ six semaines après la fin de la période de référence dans le *Quotidien* (n^{o} 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n^{o} 62-011 au catalogue, *Indice des prix de l'industrie,* paraît trois semaines environ après le communiqué dans le Quotidien. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,000 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'enquêtes directes, qui couvrent environ 85% de la valeur de la production manufacturière en 1981. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir

600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1981 Input/Output table which, in turn, is derived from 1981 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in establishments of production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically as required in December of each year, while weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

Historical Data

The 1981 = 100 industry aggregation of elemental commodities is directly relatable to the 1971 = 100 Industry Selling Price Indexes which is available from 1956 to 1985. In a note to users provided with the September 1985 issue of Catalogue 62-011 *Industry Price Indexes* the nearest equivalent series for both the 1971 and the 1981 based series were identified and the degree of compatability of the two series was stated. Link factors,

de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activité proviennent de la matrice "production" du tableau d'entrées-sorties de 1981, laquelle à son tour est établie à partir des valeurs de 1981 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux successivement plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^{I}$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

Σ_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Données historiques

L'agrégation par industries basée 1981 = 100 des produits élémentaires se rattache directement aux indices des prix de vente dans l'industrie 1971 = 100, qui existent pour la période 1956-1985. La note aux utilisateurs parue dans le numéro de septembre 1985 de la publication n^{o} 62-011 au catalogue *Indices des prix de l'industrie* identifiait la série équivalente la plus proche pour les séries basées sur 1971 et 1981, ainsi que le degré de comparabilité. Les facteurs de raccordement, calculés à partir de

derived from the relationship of the two series in December 1985, will also be published in the January issue of Catalogue 62-011. These link factors will not be revised. Users can obtain a continuous series on a 1971 = 100 base by consulting the July 1984 and the December 1985 issues of Catalogue 62-011 or by retrieving the data from CANSIM.

Reference Document

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described as are index calculation and aggregation procedures. The relationship of the new series to its Industry Selling Price predecessor is given. Comments on index use are provided.

In the tables will be found weighting patterns for both aggregations of commodities and commodities into commodity groupings. Descriptions of the characteristics of the elemental indexes are provided. A listing is provided of nearest equivalent series in the 1981 = 100 series as they relate to the 1971 = 100 Industry Selling Price Indexes.

A glossary of terms is also provided.

la relation des deux séries en décembre 1985, paraîtront également dans le numéro de janvier de la publication n^{o} 62-011 au catalogue. Ces facteurs ne seront pas révisés. Les utilisateurs peuvent obtenir une série continue sur la base 1971 = 100 en consultant le numéro de juillet 1984 et celui de décembre 1985 de la publication n^{o} 62-011 au catalogue, ou en extrayant les données de CANSIM.

Document de référence

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices. Les relations entre la nouvelle série et l'ancienne série des prix de vente dans l'industrie qui l'avait précédée s'y trouvent également. La publication contient des commentaires sur l'utilisation des indices.

Les tableaux contiennent les schémas de pondération à la fois pour les agrégats de produits et de produits en groupes. Y figurent également une description des caractéristiques des indices élémentaires ainsi qu'une liste des séries équivalentes les plus proches de la série 1981 = 100, dans la mesure où elles se rapportent aux Indices des prix de vente dans l'industrie 1971 = 100.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1981 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1981 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 1980.

These indexes are, to a large extent, a continuation of the previously published Raw Materials Price Indexes, 1977 = 100. The new, 1981 = 100 indexes can be linked with their equivalents in the 1977 = 100 series using the link factors which were released in the January 1986 issue and repeated in the February and March issues of this publication. Apart from the change in time and weight base, there have been some minor changes in the structure and methodology. Thus, the previous major group Textiles has been discontinued and the commodities forming it re-distributed: cotton is now a part of vegetable products and wool is a part of animal and animal products. Man-made fabrics, which did not satisfy the definition of raw materials, have been excluded from the revised index. At the same time, both the commodity samples and the samples of respondents have been revised and updated to give more reliable estimates of price movement. As a consequence some additional commodity detail is now available.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at

INDICES DES PRIX DES MATIÈRES BRUTES (1981 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matière brute" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1981, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 1980 de CANSIM.

Ces indices constituent, dans une large mesure, la suite des Indices des prix des matières brutes, 1977 = 100, précédemment publiés. Les nouvelles séries basées 1981 = 100 peuvent être raccordées à leurs séries équivalentes basées 1977 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de janvier 1986, et répétés dans les numéros de février et de mars 1986, de la présente publication. Outre le changement dans la période de pondération et de référence, de légères modifications ont été apportées à la structure et à la méthodologie. Ainsi, l'ancienne composante principale nommée Matières textiles a été dissoute, et les produits qui en faisaient partie ont été reclassifiés comme suit: le coton se retrouve maintenant avec les substances végétales, et la laine, avec les animaux et substances animales. Ne satisfaisant pas à la définition de matières brutes, les fibres synthétiques ont été exclues du nouvel indice. Par ailleurs, les échantillons à la fois des produits et des répondants ont été révisés et mis à jour afin d'obtenir des estimations plus fiables des mouvements de prix. En conséquence, plus de détails sont maintenant disponibles pour certains produits.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix d'autres sources bien connues soient utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont

the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1981 Input/Output tables which provide values at purchasers prices of commodities purchased as intermeditate inputs. These weights are shown in the accompanying table.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1981;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

Within individual commodity indexes, the prices are weighted according to their market share in 1981 or a more recent year. In a few instances where data are not available, the price quotations are equally weighted.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone 613-990-9607.

pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1981, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires. Ces pondérations sont présentées au tableau ci-joint.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1981;

$P_{t/c}^{i}$ est l'indice de prix pour l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

$\sum_i$ indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché en 1981 ou pour une année plus récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6, ou téléphonez au 613-990-9607.

Cattle and calves - Bovins & veaux	6.68	32.69
Sheep & lambs - Moutons et agneaux	0.03	0.19
Hogs - Swine, nes. - Porcs destinés à l'abbatage	3.59	17.57
Poultry - Volaille	1.65	8.10
Milk, whole, unprocessed - Lait, entier, non transformé	5.69	27.83
Eggs in the shell - Oeufs en coquille	0.22	1.11
Fish - Poisson	1.63	8.01
Animal textile fibres - Fibres textiles d'origine animale	0.10	0.53
Wood – Bois	**8.07**	**100.0**
Logs and bolts - Billes et billots	4.93	61.06
Pulpwood - Bois à pâte	3.14	38.93
Ferrous materials – Matières ferreuses	**2.30**	**100.0**
Iron ore - Minerais de fer	1.53	66.17
Iron & steel scrap - Déchets de fer et d'acier	0.78	33.83
Non ferrous metals – Métaux non ferreux	**11.13**	**100.0**
Copper concentrates - Concentrés de cuivre	2.83	25.43
Lead concentrates - Concentrés de plomb	0.91	8.25
Nickel concentrates - Concentrés de nickel	0.42	3.85
Zinc concentrates - Concentrés de zinc	0.63	5.74
Radio-actives concentrates - Concentrés radio-actifs	1.18	10.68
Precious metals - Métaux précieux	1.92	17.27
Other base metals - Autres métaux non ferreux	2.65	23.83
Non-ferrous scrap - Déchets de métaux non ferreux	0.54	4.91
Non-metallic minerals – Minéraux non métalliques	**2.38**	**100.0**
Sulphur - Soufre	0.16	6.78
Asbestos fibres - Fibres d'amiante	0.03	1.45
Clays and other crude refractory - Argile & autres matières réfractaires brutes	0.21	8.82
Sand and gravel - Sable et gravier	0.41	17.36
Stone - Pierre	0.68	28.70
Other crude minerals - Autres minéraux bruts	0.87	36.85
Mineral fuels – Combustibles minéraux	**45.25**	**100.0**
Coal (thermal) - Charbon (thermique)	3.48	7.70
Crude mineral oil - Huiles minérales brutes	38.38	84.80
Natural gas - Gaz naturel	3.39	7.49

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1981 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1981 as a time reference base and the weights used are 1981 company revenues from sales of electricty, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the Industry Product Price Indexes, 1981 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 1979. Indexes for the current year and the previous year are subject to revision.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1981 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnés d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1981, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1981, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1981 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 1979. Les indices de la présente année et de l'année précédente sont sujets à révision.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)

Highlights

Industrial Product Price Index (IPPI)

Preliminary figures indicate that the Industrial Product Price Index (IPPI, 1981 = 100) rose 0.4% in November 1987. This monthly increase was mainly the result of increases in the price indexes for primary metal products and for chemicals and chemical products, as well as the positive impact of the 1.3% decrease of the Canadian dollar in relation to the American dollar on the indexes for woodpulp, newsprint paper and motor vehicles. The decrease in prices for pork and for petroleum and coal products had a moderating effect on the overall index.

From November 1986 to November 1987 the IPPI increased 4.2%. This was the first time since December 1984 that the yeartoyear advance of the IPPI was over 4.0%. With the petroleum and coal products component excluded, the yeartoyear movement of the IPPI would have been 3.8%.

The price index for primary metal products continued the increase begun in March 1987, rising 2.8% in November 1987 to a level 13.4% higher than that recorded in November 1987. This was the strongest rise in prices seen in this sector since 19791980. The increase of 20.5% in the index for copper and copper alloy products dominated the monthly advance in the group index. The increases of 6.7% in the index of nickel prices and of 2.4% in the index of aluminum prices also contributed to the monthly movement.

The index of chemicals and chemical products rose 0.5% in November 1987 and was up 6.5% from November 1986. The monthly advance was mainly the result of increases of 1.5% for organic industrial chemicals, 0.7% for soaps and cleaning products and 0.6% for toilet preparations. Despite being up 17.3% from November 1986, prices for organic industrial chemicals were at a level only slightly higher than in 1981.

In November 1987, the 1.3% decrease of the Canadian dollar relative to the American dollar, by increasing the value in Canadian dollars of exported products quoted in American currency, was mainly responsible for the increases of 1.5% for woodpulp, 1.4% for newsprint paper and 0.8% for motor vehicles.

The price index for meat products fell 1.3% in November, dropping to a level 2.8% lower than in November 1986. This monthly decrease was mainly the result of lower prices for pork (3.1%), for smoked ham (4.1%) and for smoked bacon (4.8%). Over the year, most prices for meat products posted decreases, ranging from 9.0% for chicken to 6.7% for pork and 2.9% for beef.

Preliminary estimates indicate that the price index for petroleum and coal products fell 0.6% in November 1987, mainly as a result of price decreases for fuel oils. Prices for petroleum and coal products, which had been advancing regularly since the beginning of 1987, posted their second straight monthly decrease. In spite of these decreases, the component index remained 8.0% higher than it's yearearlier level.

The price index for lumber and sawmill products fell 0.4% in November 1987, dropping to a level 1.4% higher than that recorded in November 1986. The monthly decline was largely the result of the combined effect of the decrease of 6.9% in prices for softwood veneer and plywood and the 0.4% increase in prices for softwood lumber.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1981 = 100) a augmenté de 0.4% au mois de novembre 1987. Cette hausse mensuelle fut surtout attribuable aux augmentations des indices des prix des produits métalliques primaires et des produits chimiques, de même qu'à l'impact positif de la baisse de 1.3% du dollar canadien par rapport à la devise américaine sur les indices des pâtes de bois, du papier journal et des véhicules automobiles. En contrepartie, la baisse des prix du porc et des produits du pétrole et du charbon ont exercé un effet modérateur sur l'indice d'ensemble.

La progression annuelle de l'IPPI, de novembre 1986 à novembre 1987, a atteint 4.2%. Il s'agissait là de la première fois depuis décembre 1984 que la progression annuelle de l'IPPI s'établissait au-dessus de 4.0%. En excluant la composante des produits du pétrole et du charbon, l'IPPI s'inscrivait en hausse de 3.8% d'une année à l'autre.

L'indice des prix des produits métalliques primaires a poursuivi sa progression entreprise depuis mars dernier en s'accroissant de 2.8% en novembre 1987. L'indice s'inscrit maintenant en hausse de 13.4% par rapport à novembre 1986, ce qui correspond à la plus forte poussée des prix dans ce secteur depuis les années 19791980. L'augmentation de 20.5% de l'indice des prix du cuivre et des alliages de cuivre a largement dominé la progression mensuelle de l'indice du groupe. Les hausses de 6.7% de l'indice des prix du nickel et de 2.4% de l'indice des prix de l'aluminium ont également contribué au mouvement mensuel.

L'indice des prix des produits chimiques s'est accru de 0.5% au mois de novembre 1987, en hausse de 6.5% par rapport à novembre 1986. L'accroissement mensuel a résulté principalement des augmentations de 1.5% des produits chimiques industriels organiques, de 0.7% des savons et produits de nettoyage et de 0.6% des articles de toilette. En hausse de 17.3% par rapport à novembre 1986, les prix des produits chimiques industriels organiques se retrouvent néanmoins à un niveau que très légèrement supérieur à celui de 1981.

En novembre 1987, la baisse de 1.3% du dollar canadien par rapport à la devise américaine, en augmentant la valeur en dollars canadiens des produits exportés cotés en dollars américains, fut en majeure partie responsable des hausses de prix de 1.5% pour les pâtes de bois, de 1.4% pour le papier journal et de 0.8% pour les véhicules automobiles.

L'indice des prix des produits de la viande a diminué de 1.3% en novembre 1987, en baisse de 2.8% par rapport à novembre 1986. La baisse mensuelle fut en majeure partie attribuable aux diminutions de 3.1% des prix du porc, de 4.1% des prix du jambon fumé et de 4.8% des prix du bacon fumé. Par rapport à novembre 1986, la plupart des prix pour les produits de la viande ont affiché des baisses, allant de 9.0% pour le poulet à 6.7% pour le porc et 2.9% pour le boeuf.

Selon les premières estimations, l'indice des prix des produits du pétrole et du charbon a diminué de 0.6% au mois de novembre 1987 en raison principalement de la baisse des prix des mazouts. Après avoir progressé de façon régulière depuis le début de 1987, les prix des produits du pétrole et du charbon enregistrait ainsi une deuxième baisse mensuelle consécutive, pour se retrouver à un niveau supérieur de 8.0% par rapport à l'année dernière.

L'indice des prix des sciages et des produits de scierie a diminué de 0.4% en novembre 1987, pour s'établir en hausse de 1.4% par rapport à novembre 1986. Le repli mensuel fut en majeure partie attribuable à la baisse de 6.9% des prix des placages et contreplaqués de bois résineux, compensée partiellement par la hausse de 0.4% des prix des bois résineux de construction.

Highlights

Raw Materials Price Index

Preliminary estimates show the Raw Materials Price Index (RMPI, 1981=100) decreased 0.1% between October and November to a level of 104.4. The effect of a 3.3% drop in the animals and animal products component index was completely offset by a 6.6% increase for the nonferrous metals component index. The index for ferrous materials increased 1.5% over the month, while the vegetable products component index dropped 1.2%. Over the year, the RMPI increased 10.6%, down from the 11.4% yearly movement posted in October, the 13.0% registered in September and the 16.9% yeartoyear movement noted in August. Excluding the mineral fuels component, the RMPI registered a 0.2% decrease over the month to stand at an index level 5.7% higher than a year ago. Of the seven components making up the Raw Materials Price Index, three posted increases, three registered decreases and one remained unchanged from the previous month.

A 3.3% decrease was registered for the animals and animal products component index in November. Over the year this index has decreased 2.0% to its present level of 115.9. Hog prices declined for the third consecutive month. This index was 15.0% lower in November than in October and was 23.6% below its November 1986 level. Poultry prices dipped 1.8% over the month to stand 7.2% lower than a year ago. Cattle and calves were also down over the month, posting a 1.9% decrease in November.

The index for the nonferrous metals component jumped 6.6% in November to a level of 117.6. Over the year this index has risen 30.2%. In November, copper prices rose 23.1% to an index level 63.6% higher than in November 1986. Nickel prices were up 10.1% over the month and 39.0% over the year. Zinc was up 2.6% in November and the index for other base metals increased 2.4%. Precious metals were down 2.7% in November, with decreases registered for gold, silver and platinum.

The vegetable products component index dropped 1.2% in November to a level of 84.0. This index was 2.9% lower than its November 1986 level. This monthly decrease was caused by potato prices plummetting 46.2%. Over the year, potatoes dropped 19.0%. The large monthly decrease for potatoes was slightly offset by a 3.9% increase for cocoa, coffee and tea and a 3.5% increase for raw tobacco.

The ferrous materials component index rose 1.5% in November to stand at a level 1.7% higher than a year ago. Iron ore prices rose 1.0%, but despite this monthly increase, remained 3.9% below their year earlier levels. Iron and steel scrap were up 2.3% over the month and 14.6% over the year.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1981=100) a diminué de 0.1% entre octobre et novembre pour s'établir au niveau de 104.4. L'effet de la baisse de 3.3% de l'indice de la composante des animaux et des substances animales a été complètement contrebalancé par la hausse de 6.6% de l'indice de la composante des métaux non ferreux. L'indice des matières ferreuses s'est accru de 1.5% pendant le mois, alors que l'indice de la composante des substances végétales a chuté de 1.2%. En un an, l'IPMB a augmenté de 10.6%, en baisse à la fois par rapport à la variation annuelle de 11.4% enregistrée en octobre, à celle de 13.0% observée en septembre et à celle de 16.9% relevée en août. Si on exclut la composante des combustibles minéraux, l'IPMB a diminué de 0.2% au cours du mois, pour s'établir à un niveau de 5.7% supérieur à celui enregistré un an plus tôt. Sur les sept composantes de l'IPMB, trois ont progressé, trois ont reculé et une est demeurée inchangée par rapport au mois précédent.

L'indice de la composante des animaux et des substances animales a chuté de 3.3% en novembre. Cet indice s'est replié de 2.0% en un an pour s'établir au niveau actuel de 115.9. Les prix des porcs ont baissé pour le troisième mois de suite. Cet indice était 15.0% plus bas en novembre qu'en octobre et de 23.6% inférieur à son niveau de novembre 1986. Les prix de la volaille ont diminué de 1.8% en novembre, en baisse de 7.2% par rapport à l'année dernière. Les prix des bovins et des veaux ont également chuté au cours du mois, soit de 1.9%.

L'indice de la composante des métaux non férreux a progressé de 6.6% en novembre pour atteindre le niveau de 117.6. Au cours de l'année, il s'est accru de 30.2%. En novembre, les prix du cuivre ont grimpé de 23.1% pour dépasser de 63.6% le niveau d'un an plus tôt. Les prix du nickel ont avancé de 10.1% en novembre et de 39.0% en un an. Les prix du zinc ont augmenté de 2.6% en novembre et l'indice des autres métaux non ferreux a avancé de 2.4%. L'indice des métaux précieux a régressé de 2.7% en novembre, les prix de l'or, de l'argent et du platine ayant baissé.

L'indice de la composante des substances végétales a reculé de 1.2% en novembre pour se situer à 84.0, soit 2.9% plus bas que le niveau de novembre 1986. Cette diminution mensuelle fut attribuable à la chute de 46.2% des prix des pommes de terre. Au cours de l'année, ceux-ci ont baissé de 19.0%. La forte baisse mensuelle des prix des pommes de terre a été légèrement compensée par la hausse de 3.9% des prix du cacao, du café et du thé et par la majoration de 3.5% des prix du tabac en feuilles.

L'indice de la composante des matières ferreuses s'est accru de 1.5% en novembre pour dépasser de 1.7% le niveau d'un an plus tôt. Les prix des minerais de fer ont progressé de 1.0%, mais sont demeurés de 3.9% inférieurs à leur niveau de novembre 1986. Les prix des déchets de fer et d'acier ont grimpé de 2.3% au cours du mois et de 14.6% au cours des douze derniers mois.

(1) Revised.
(1) Révisé.
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given; occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue No. 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité.
Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) Net outflow indexes are calculated for the major groups described by the 1970 Standard Industrial Classification. The 1980 SIC is not used because the Input-Output tables are not yet available on the updated classification.

(1) Les indices des sorties nettes sont calculés pour les groupes principaux dérivés de la Classification des activités économiques de 1970. La classification type des industries de 1980 n'est pas utilisée en raison de l'indisponibilité des tableaux des Entrées-Sorties suivant la nouvelle classification.

TABLE 6. Electric Power Selling Price Indexes, for Non-residential Customers

TABLEAU 6. Indices des prix de vente de l'énergie électrique, pour les acheteurs non-résidentiels

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1981 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1981 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported most often for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about 6 weeks after the reference period in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about three weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,000 producers for goods sold which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is made of the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct surveys and these account for about 85% of the value of manufacturing output in 1981. The price movement for the remaining

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1981 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1981. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés le plus souvent pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ six semaines après la fin de la période de référence dans le *Quotidien* (n^{O} 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n^{O} 62-011 au catalogue, *Indice des prix de l'industrie,* paraît trois semaines environ après le communiqué dans le Quotidien. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,000 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'enquêtes directes, qui couvrent environ 85% de la valeur de la production manufacturière en 1981. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir

600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1981 Input/Output table which, in turn, is derived from 1981 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in establishments of production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically as required in December of each year, while weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

Historical Data

The 1981 = 100 industry aggregation of elemental commodities is directly relatable to the 1971 = 100 Industry Selling Price Indexes which is available from 1956 to 1985. In a note to users provided with the September 1985 issue of Catalogue 62-011 *Industry Price Indexes* the nearest equivalent series for both the 1971 and the 1981 based series were identified and the degree of compatability of the two series was stated. Link factors,

de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activité proviennent de la matrice "production" du tableau d'entrées-sorties de 1981, laquelle à son tour est établie à partir des valeurs de 1981 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux successivement plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^{i}$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$ signifie la sommation de tous les éléments i dans l'agrégat défini.

Données historiques

L'agrégation par industries basée 1981 = 100 des produits élémentaires se rattache directement aux indices des prix de vente dans l'industrie 1971 = 100, qui existent pour la période 1956-1985. La note aux utilisateurs parue dans le numéro de septembre 1985 de la publication n^{O} 62-011 au catalogue *Indices des prix de l'industrie* identifiait la série équivalente la plus proche pour les séries basées sur 1971 et 1981, ainsi que le degré de comparabilité. Les facteurs de raccordement, calculés à partir de

derived from the relationship of the two series in December 1985, will also be published in the January issue of Catalogue 62-011. These link factors will not be revised. Users can obtain a continuous series on a 1971 = 100 base by consulting the July 1984 and the December 1985 issues of Catalogue 62-011 or by retrieving the data from CANSIM.

Reference Document

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described as are index calculation and aggregation procedures. The relationship of the new series to its Industry Selling Price predecessor is given. Comments on index use are provided.

In the tables will be found weighting patterns for both aggregations of commodities and commodities into commodity groupings. Descriptions of the characteristics of the elemental indexes are provided. A listing is provided of nearest equivalent series in the 1981 = 100 series as they relate to the 1971 = 100 Industry Selling Price Indexes.

A glossary of terms is also provided.

la relation des deux séries en décembre 1985, paraîtront également dans le numéro de janvier de la publication n^{o} 62-011 au catalogue. Ces facteurs ne seront pas révisés. Les utilisateurs peuvent obtenir une série continue sur la base 1971 = 100 en consultant le numéro de juillet 1984 et celui de décembre 1985 de la publication n^{o} 62-011 au catalogue, ou en extrayant les données de CANSIM.

Document de référence

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices. Les relations entre la nouvelle série et l'ancienne série des prix de vente dans l'industrie qui l'avait précédée s'y trouvent également. La publication contient des commentaires sur l'utilisation des indices.

Les tableaux contiennent les schémas de pondération à la fois pour les agrégats de produits et de produits en groupes. Y figurent également une description des caractéristiques des indices élémentaires ainsi qu'une liste des séries équivalentes les plus proches de la série 1981 = 100, dans la mesure où elles se rapportent aux Indices des prix de vente dans l'industrie 1971 = 100.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1981 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1981 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 1980.

These indexes are, to a large extent, a continuation of the previously published Raw Materials Price Indexes, 1977 = 100. The new, 1981 = 100 indexes can be linked with their equivalents in the 1977 = 100 series using the link factors which were released in the January 1986 issue and repeated in the February and March issues of this publication. Apart from the change in time and weight base, there have been some minor changes in the structure and methodology. Thus, the previous major group Textiles has been discontinued and the commodities forming it re-distributed: cotton is now a part of vegetable products and wool is a part of animal and animal products. Man-made fabrics, which did not satisfy the definition of raw materials, have been excluded from the revised index. At the same time, both the commodity samples and the samples of respondents have been revised and updated to give more reliable estimates of price movement. As a consequence some additional commodity detail is now available.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at

INDICES DES PRIX DES MATIÈRES BRUTES (1981 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matière brute" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1981, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 1980 de CANSIM.

Ces indices constituent, dans une large mesure, la suite des Indices des prix des matières brutes, 1977 = 100, précédemment publiés. Les nouvelles séries basées 1981 = 100 peuvent être raccordées à leurs séries équivalentes basées 1977 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de janvier 1986, et répétés dans les numéros de février et de mars 1986, de la présente publication. Outre le changement dans la période de pondération et de référence, de légères modifications ont été apportées à la structure et à la méthodologie. Ainsi, l'ancienne composante principale nommée Matières textiles a été dissoute, et les produits qui en faisaient partie ont été reclassifiés comme suit: le coton se retrouve maintenant avec les substances végétales, et la laine, avec les animaux et substances animales. Ne satisfaisant pas à la définition de matières brutes, les fibres synthétiques ont été exclues du nouvel indice. Par ailleurs, les échantillons à la fois des produits et des répondants ont été révisés et mis à jour afin d'obtenir des estimations plus fiables des mouvements de prix. En conséquence, plus de détails sont maintenant disponibles pour certains produits.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix d'autres sources bien connues soient utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont

the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1981 Input/Output tables which provide values at purchasers prices of commodities purchased as intermeditate inputs. These weights are shown in the accompanying table.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1981, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires. Ces pondérations sont présentées au tableau ci-joint.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1981;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1981;

$P_{t/o}^i$ est l'indice de prix pour l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

$\sum_i$ indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in 1981 or a more recent year. In a few instances where data are not available, the price quotations are equally weighted.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone 613-990-9607.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché en 1981 ou pour une année plus récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6, ou téléphonez au 613-990-9607.

RAW MATERIALS PRICE INDEX, 1981 = 100, WEIGHTING DIAGRAM

INDICE DES PRIX DES MATIERES BRUTES, 1981 = 100, SCHEMA DE PONDÉRATION

Index - Indice	Weights - Pondérations	
	Total Ensemble	Major group Groupe majeur
	percentage - pourcentage	
Raw materials - Total - Ensemble des matières brutes	100.0	
Total excluding mineral fuels - Ensemble sauf combustibles minéraux	54.74	
Vegetable products – Substances végétales	**10.40**	**100.0**
Fresh fruits - Fruits frais	0.49	4.79
Grains - Céréales	3.47	33.39
Oilseeds - Oléagineux	1.56	15.01
Fresh vegetables - Légumes frais	1.07	10.37
Tobacco, raw - Tabac, en feuilles	0.76	7.35
Sugar, unrefined - Sucre, non raffiné	1.23	11.85
Natural rubber & allied gums - Caoutchouc et gommes analogues, naturels	0.28	2.70
Cocoa, coffee & tea - Cacao, café et thé	1.02	9.83
Hay & forage - Foin et fourage	0.03	0.37
Vegetable textile fibres - Fibres textiles d'origine végétale	0.44	4.28
Animal & animal products – Animaux et substances animales	**20.44**	**100.0**
Furs, hides & skins - Fourrures, cuirs & peaux	0.80	3.93
Cattle and calves - Bovins & veaux	6.68	32.69
Sheep & lambs - Moutons et agneaux	0.03	0.19
Hogs - Swine, nes. - Porcs destinés à l'abbatage	3.59	17.57
Poultry - Volaille	1.65	8.10
Milk, whole, unprocessed - Lait, entier, non transformé	5.69	27.83
Eggs in the shell - Oeufs en coquille	0.22	1.11
Fish - Poisson	1.63	8.01
Animal textile fibres - Fibres textiles d'origine animale	0.10	0.53
Wood – Bois	**8.07**	**100.0**
Logs and bolts - Billes et billots	4.93	61.06
Pulpwood - Bois à pâte	3.14	38.93
Ferrous materials – Matières ferreuses	**2.30**	**100.0**
Iron ore - Minerais de fer	1.53	66.17
Iron & steel scrap - Déchets de fer et d'acier	0.78	33.83
Non ferrous metals – Métaux non ferreux	**11.13**	**100.0**
Copper concentrates - Concentrés de cuivre	2.83	25.43
Lead concentrates - Concentrés de plomb	0.91	8.25
Nickel concentrates - Concentrés de nickel	0.42	3.85
Zinc concentrates - Concentrés de zinc	0.63	5.74
Radio-actives concentrates - Concentrés radio-actifs	1.18	10.68
Precious metals - Métaux précieux	1.92	17.27
Other base metals - Autres métaux non ferreux	2.65	23.83
Non-ferrous scrap - Déchets de métaux non ferreux	0.54	4.91
Non-metallic minerals – Minéraux non métalliques	**2.38**	**100.0**
Sulphur - Soufre	0.16	6.78
Asbestos fibres - Fibres d'amiante	0.03	1.45
Clays and other crude refractory - Argile & autres matières réfractaires brutes	0.21	8.82
Sand and gravel - Sable et gravier	0.41	17.36
Stone - Pierre	0.68	28.70
Other crude minerals - Autres minéraux bruts	0.87	36.85
Mineral fuels – Combustibles minéraux	**45.25**	**100.0**
Coal (thermal) - Charbon (thermique)	3.48	7.70
Crude mineral oil - Huiles minérales brutes	38.38	84.80
Natural gas - Gaz naturel	3.39	7.49

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1981 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1981 as a time reference base and the weights used are 1981 company revenues from sales of electricty, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the Industry Product Price Indexes, 1981 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 1979. Indexes for the current year and the previous year are subject to revision.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1981 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnés d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1981, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1981, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1981 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 1979. Les indices de la présente année et de l'année précédente sont sujets à révision.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9689) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Highlights

Industrial Product Price Index (IPPI)

Preliminary figures indicate that the Industrial Product Price Index (IPPI, 1981 = 100) fell 0.1% in December 1987. This monthly decline was mainly the result of the price decrease for petroleum and coal products, which was offset to a large extent by price increases for copper products and nickel products. To a lesser degree, the price decreases for motor vehicles, meat products and softwood lumber, as well as a price increase for feeds, also contributed to the monthly movement in the overall index.

The advance in the IPPI from December 1986 to December 1987 was 4.3%. Except for a slight decline in October, the year-to-year advance in the IPPI rose steadily during 1987. With the petroleum and coal products component excluded, the IPPI was up 4.2% over the year.

Preliminary estimates indicate that the price index for petroleum and coal products fell 3.9% in December 1987, mainly as a result of the large decrease in motor gasoline prices. From a peak of 9.1% reached in October, the annual rate of change of the index fell to 5.5% in December.

The price index for primary metal products rose 2.8% in December 1987, and was up 17.1% from December 1986. Price increases of 15.6% for copper and copper alloy products and increases of 15.7% for nickel products were the major contributors to the monthly movement in the group index. Prices for copper and nickel were up 76.6% and 54.0% respectively from December 1986.

The price index for motor vehicles declined 0.5% in December 1987, and was down 2.7% from December 1986. The 0.8% increase in the Canadian dollar relative to the American dollar, by decreasing the value in Canadian dollars of exported goods quoted in American currency, was the main factor in the monthly decline of the group index.

The price index for meat products decreased 0.7% in December 1987, falling to a level 2.6% lower than in December 1986. Price decreases of 4.7% for chicken and 1.3% for beef more than offset a 0.8% price increase for pork.

The price index for softwood lumber posted a 0.7% decrease in December 1987, though it was still up 2.5% from December 1986. Price decreases of 2.2% for spruce in Ontario and 5.2% for hemlock in British Columbia were partly offset by a 2.9% increase for western red cedar in British Columbia.

The price index for feeds rose 2.2% in December 1987, and was up 5.1% from December 1986. The monthly increase was mainly the result of price increases of 2.1% for prepared feeds and 4.0% for feed additives and all other feeds. Despite these increases, prices for feeds still had not returned to their average level in 1981.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1981 = 100) a diminué de 0.1% au mois de décembre 1987. Ce repli mensuel fut surtout attribuable à la baisse des prix des produits du pétrole et du charbon, contrebalancée en majeure partie par les hausses des prix des produits du cuivre et du nickel. Dans une moindre mesure, les baisses de prix des véhicules automobiles, des produits de la viande et du bois résineux de construction, de même que la hausse de prix des aliments pour animaux, ont également contribué au mouvement mensuel de l'indice d'ensemble.

La progression annuelle de l'IPPI, de décembre 1986 à décembre 1987, s'est établie à 4.3%. Exception faite d'un léger repli au mois d'octobre, la progression annuelle de l'IPPI s'est ainsi accrue de façon régulière au cours de 1987. En excluant la composante des produits du pétrole et du charbon, l'IPPI s'inscrivait en hausse de 4.2% d'une année à l'autre.

Selon les premières estimations, l'indice des prix des produits du pétrole et du charbon a diminué de 3.9% au mois de décembre 1987, en raison principalement de la forte baisse des prix de l'essence à moteur. D'un sommet de 9.1% atteint en octobre, le taux de variation annuel de cet indice est passé à 5.5% en décembre.

L'indice des prix des produits métalliques primaires s'est accru de 2.8% en décembre 1987, en hausse de 17.1% par rapport à décembre 1986. Les augmentations de 15.6% des prix des produits du cuivre et des alliages de cuivre et de 15.7% des prix des produits du nickel furent les principaux responsables du mouvement mensuel de l'indice du groupe. Par rapport à décembre 1986, les prix du cuivre et du nickel étaient respectivement en hausse de 76.6% et de 54.0%.

L'indice des prix des véhicules automobiles s'est replié de 0.5% en décembre 1987, en baisse de 2.7% par rapport à décembre 1986. La hausse de 0.8% du dollar canadien par rapport à la devise américaine, en diminuant la valeur en dollars canadiens des biens exportés cotés en devise américaine, a largement contribué au repli mensuel de l'indice du groupe.

L'indice des prix des produits de la viande a diminué de 0.7% en décembre 1987, pour se retrouver à un niveau inférieur de 2.6% par rapport à décembre 1986. Les baisses de prix de 4.7% pour le poulet et de 1.3% pour le boeuf ont plus que contrebalancé la hausse de 0.8% des prix du porc.

L'indice des prix du bois résineux de construction a enregistré une baisse de 0.7% en décembre 1987, en hausse cependant de 2.5% par rapport à décembre 1986. Les diminutions de prix de 2.2% pour l'épinette en Ontario et de 5.2% pour la pruche en Colombie-Britannique furent partiellement compensées par la hausse de 2.9% pour le thuya géant en Colombie-Britannique.

L'indice des prix des aliments pour animaux s'est accru de 2.2% en décembre 1987, en hausse de 5.1% par rapport à décembre 1986. L'accroissement mensuel a surtout résulté des hausses de prix de 2.1% pour les aliments préparés pour animaux et de 4.0% pour les additifs et autres aliments pour animaux. Malgré ces augmentations, les prix des aliments pour animaux n'avaient pas encore retrouvé leur niveau moyen de 1981.

Highlights

Raw Materials Price Index

Preliminary estimates show the Raw Materials Price Index (RMPI, 1981 = 100) decreased 0.1% between November and December to a level of 104.4. This slight decrease was primarily the result of a 2.7% drop in the mineral fuels component that was almost completely offset by a 7.2% increase for the non- ferrous metals component and a 1.8% increase for the wood component. Over the year, the RMPI increased 9.9%, continuing the deceleration in the yearly rate of change since the 16.9% yearly increase noted in August. Excluding the mineral fuels component, the RMPI registered a 1.7% increase over the month to stand at a level 8.5% higher than a year ago. Of the seven components making up the Raw Materials Price Index, three registered increases while four posted decreases from the previous month.

A 2.7% decrease was registered for the mineral fuels component index in December. Despite the monthly decrease, this index was still 12.2% higher than its year earlier level and stood at 92.9. An estimated 3.2% decrease in crude oil prices was the primary factor in the lower component index. However, a 1.3% decrease in thermal coal prices and a 0.8% drop in natural gas prices also contributed to the monthly decline of the mineral fuels component index. Crude oil prices remained 16.3% higher than in December 1986 while thermal coal prices have dropped 2.8% over the year and natural gas prices were down 1.1% from a year ago.

The index for the non-ferrous metals component rose 7.2% in December to stand at a level of 126.1. Over the year, this index has risen 40.1%. Reports of tight supplies and steady demand continued as copper prices rose another 19.0% in December. Copper prices were 91.3% above their level of a year ago. Nickel prices have also registered dramatic increases, up 17.4% in December and 63.8% higher than in December 1986. Precious metals were up 5.0% over the month, with increases registered for gold, silver and platinum.

The wood component index increased 1.8% in December to a level of 127.4. Over the year, this index has increased 11.0%. Prices for logs and bolts were up 3.2% over the month and 17.5% over the year. These strong increases contrast with the 0.6% decrease posted in December for pulpwood. Pulpwood prices were only 0.5% higher than a year ago.

The vegetable products component index edged down 0.1% over the month. The component index has dropped 1.3% since December 1986 to stand at a level of 84.7. Grain prices continued to be weak and were down 0.6% over the month and 5.5% over the year. Wheat, barley and buckwheat prices were all lower in December. Oilseed prices increased 1.4% in December as soybeans, rapeseed and flaxseed were all up. Over the year, oil seeds have increased 11.3%. After falling 46.2% in November, potato prices fell another 5.7% in December.

Over the month, the index for the animals and animal products component decreased 0.3% to stand at a level of 115.4. On a year over year basis, this index has decreased 0.5%. Cattle and calves prices were down 0.3% in December, the third consecutive monthly decrease, however, they were up 3.2% since December 1986. Hogs declined 1.2% over the month to stand 19.1% lower than their year earlier level. Poultry prices dropped 2.5% in December and were 8.4% lower than a year ago.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1981 = 100) a diminué de 0.1% entre novembre et décembre pour s'établir au niveau de 104.4. Cette modeste baisse a résulté principalement du recul de 2.7% de la composante des combustibles minéraux, qui fut presque complètement contrebalancé par l'augmentation de 7.2% de la composante des métaux non ferreux et par l'accroissement de 1.8% de la composante du bois. En un an, l'IPMB a augmenté de 9.9%, ce qui poursuit le ralentissement du taux de variation annuel observé depuis août, alors que ce taux s'établissait à 16.9%. L'IPMB sans la composante des combustibles minéraux a progressé de 1.7% au cours du mois pour se fixer à un niveau dépassant de 8.5% celui d'il y a un an. Des sept composantes de l'indice des prix des matières brutes, trois ont augmenté et quatre ont diminué par rapport au mois précédent.

L'indice de la composante des combustibles minéraux s'est inscrit en baisse de 2.7% en décembre. Malgré cette diminution mensuelle, l'indice dépassait toujours de 12.2% son niveau d'il y a un an et s'établissait à 92.9. Une baisse estimée à 3.2% des prix des huiles minérales brutes a été la principale cause du recul de l'indice de la composante. Toutefois, une diminution de 1.3% des prix du charbon thermique et un fléchissement de 0.8% des prix du gaz naturel ont également contribué à la diminution mensuelle de l'indice de la composante des combustibles minéraux. Les prix des huiles minérales brutes sont demeurés en hausse de 16.3% par rapport à décembre 1986, alors que les prix du charbon thermique ont fléchi de 2.8% au cours de l'année et ceux du gaz naturel, de 1.1%.

L'indice de la composante des métaux non ferreux s'est accru de 7.2% en décembre pour s'établir à 126.1. En un an, cet indice a augmenté de 40.1%. Une nouvelle hausse des prix du cuivre, cette fois de 19.0%, a été observée en décembre. Selon les informations disponibles, les stocks sont demeurés limités et la demande, constante. Les prix du cuivre dépassaient de 91.3% leur niveau d'il y a un an. Les prix du nickel ont également fortement augmenté, en hausse de 17.4% en décembre et de 63.8% par rapport à décembre 1986. Les métaux précieux ont progressé de 5.0% en un mois, des hausses ayant été observées pour l'or, l'argent et le platine.

L'indice de la composante du bois a augmenté de 1.8% en décembre pour se fixer à 127.4. En un an, cet indice a progressé de 11.0%. Les prix des billes et des billots ont gagné 3.2% en un mois et 17.5% en un an. Ces fortes hausses contrastent avec la diminution de 0.6% observée pour le bois à pâte en décembre. Les prix du bois à pâte ne dépassaient que de 0.5% ceux d'il y a un an.

L'indice de la composante des substances végétales a fléchi de 0.1% au cours du mois. L'indice de la composante a chuté de 1.3% depuis décembre 1986 pour s'établir à 84.7. La faiblesse des prix des céréales est toujours manifeste avec une baisse de 0.6% en un mois et de 5.5% en un an. Les prix du blé, de l'orge et du sarrasin ont tous diminué en décembre. Les prix des oléagineux ont augmenté de 1.4% en décembre, le soja, le colza et le lin étant en hausse. En un an, les prix des oléagineux ont grimpé de 11.3%. Après avoir baissé de 46.2% en novembre, les prix des pommes de terre ont chuté de 5.7% en décembre.

Au cours du mois, l'indice des animaux et substances animales a reculé de 0.3% pour se fixer à 115.4. D'une année à l'autre, cet indice s'est replié de 0.5%. Les prix des bovins et des veaux ont baissé de 0.3% en décembre, soit une troisième diminution mensuelle d'affilée, mais sont en hausse de 3.2% par rapport à décembre 1986. Les prix des porcs ont fléchi de 1.2% au cours du mois pour s'établir à un niveau inférieur de 19.1% à celui d'il y a un an. Les prix de la volaille ont chuté de 2.5% en décembre et sont inférieurs de 8.4% à ceux observés un an auparavant.

	Animal & animal products – Animaux & substances animales	115.4	115.8	– 0.3	– 5.6	– 0.5
	Wood – Bois	127.4	125.1	1.8	3.7	11.0
	Ferrous material – Matières ferreuses	111.9	112.6	– 0.6	3.4	2.3
	Non ferrous metals – Métaux non ferreux	126.1	117.6	7.2	17.1	40.1
	Non metallic minerals – Minéraux non métalliques	127.1	126.9	0.2	– 0.2	0.0
	Mineral fuels – Combustibles minéraux	92.9	95.5	– 2.7	– 4.8	12.2

(1) Revised.
(1) Revisé.
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agregation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations des produits

1981 = 100

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given; occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue No. 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité.
Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLE 5. Industrial Product Price Indexes: Net Outflows by Major Group(1)

TABLEAU 5. Indices des prix des produits industriels: sorties nettes par groupes principaux d'industries(1)

1981 = 100 1981 = 100

	Month – Mois												Annual average – Moyenne annuelle
	Jan. – Janv.	Feb. – Fév.	March – Mars	April – Avril	May – Mai	June – Juin	July – Juill.	Aug. – Août	Sept.	Oct.	Nov.	Déc.	
Indexes of net outflows of total manufacturing – Indices des sorties nettes de l'ensemble des industries manufacturières **D 613800**													
Indexes of net outflows of food and beverage industries – Indices des sorties nettes des industries des aliments et boissons D 613801													
Indexes of net outflows of tobacco products industries – Indices des sorties nettes des industries des produits du tabac D 613802													
Indexes of net outflows of rubber and plastics products industries – Indices des sorties nettes des industries du caoutchouc et des produits en matière plastique D 613803													
Indexes of net outflows of leather industries – Indices des sorties nettes des industries du cuir D 613804													
Indexes of net outflows of textile industries – Indices des sorties nettes des industries textiles D 613805													
Indexes of net outflows of knitting mills – Indices des sorties nettes des bonneteries D 613806						Not available at this time.							
Indexes of net outflows of clothing industries – Indices des sorties nettes des industries du vêtement D 613807						Non disponible pour le moment.							
Indexes of net outflows of wood industries – Indices des sorties nettes des industries du bois D 613808													
Indexes of net outflows of furniture and fixture industries – Indices des sorties nettes des industries du meuble et des articles d'ameublement D 613809													
Indexes of net outflows of paper and allied industries – Indices des sorties nettes des industries du papier et activités connexes D 613810													
Indexes of net outflows of printing, publishing and allied industries – Indices des sorties nettes des industries d'imprimerie, édition et activités connexes D 613811													
Indexes of net outflows of primary metal industries – Indices des sorties nettes des industries de la première transformation des métaux D 613812													
Indexes of net outflows of metal fabricating industries (excl. machinery and transportation equipment) – Indices des sorties nettes des industries de la fabr. des prod. en métal (sauf mach. et mat. de transp.) D 613813													

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.
See footnote(s) at end of table. – Voir note(s) à la fin du tableau.

TABLE 5. Industrial Product Price Indexes: Net Outflows by Major Group(1)

TABLEAU 5. Indices des prix des produits industriels: sorties nettes par groupes principaux d'industries(1)

1981 = 100 1981 = 100

	Month - Mois												Annual average – Moyenne annuelle
	Jan – Janv.	Feb. – Fév.	March – Mars	April – Avril	May – Mai	June – Juin	July – Juill.	Aug. – Août	Sept.	Oct.	Nov.	Déc.	
Indexes of net outflows of machinery industries (except electrical) – Indices des sorties nettes des industries de la fabrication de machines (sauf électriques) D 613814													
Indexes of net outflows of transportation equipment industries – Indices des sorties nettes des industries de la fabrication de matériel de transport D 613815													
Indexes of net outflows of electrical products industries – Indices des sorteis nettes des industries de la fabrication de produits électriques D 613816													
Indexes of net outflows of non-metallic mineral products industries – Indices des sorties nettes des industries de la fabrication de produits minéraux non métalliques D 613817	Not available at this time. Non disponible pour le moment.												
Indexes of net outflows of petroleum and coal products industries – Indices des sorties nettes des industries de la fabrication de produits du pétrole et du charbon D 613818													
Indexes of net outflows of chemical and chemical products industries – Indices des sorties nettes des industries chimiques D 613819													
Indexes of net outflows of miscellaneous manufacturing industries – Indices des sorties nettes des industries manufacturières diverses D 613820													

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) Net outflow indexes are calculated for the major groups described by the 1970 Standard Industrial Classification. The 1980 SIC is not used because the Input-Output tables are not yet available on the updated classification. — Les indices des sorties nettes sont calculés pour les groupes principaux dérivés de la Classification des activités économiques de 1970. La classification type des industries de 1980 n'est pas utilisée en raison de l'indisponibilité des tableaux des Entrées-Sorties suivant la nouvelle classification.

TABLE 6. Electric Power Selling Price Indexes, for Non-residential Customers

TABLEAU 6. Indices des prix de vente de l'énergie électrique, pour les acheteurs non-résidentiels

1981 = 100

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1981 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1981 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported most often for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about 6 weeks after the reference period in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about three weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,000 producers for goods sold which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is made of the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct surveys and these account for about 85% of the value of manufacturing output in 1981. The price movement for the remaining

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1981 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1981. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés le plus souvent pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ six semaines après la fin de la période de référence dans le *Quotidien* (n^{o} 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n^{o} 62-011 au catalogue, *Indice des prix de l'industrie,* paraît trois semaines environ après le communiqué dans le Quotidien. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,000 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'enquêtes directes, qui couvrent environ 85% de la valeur de la production manufacturière en 1981. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir

600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1981 Input/Output table which, in turn, is derived from 1981 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in establishments of production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically as required in December of each year, while weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

Historical Data

The 1981 = 100 industry aggregation of elemental commodities is directly relatable to the 1971 = 100 Industry Selling Price Indexes which is available from 1956 to 1985. In a note to users provided with the September 1985 issue of Catalogue 62-011 *Industry Price Indexes* the nearest equivalent series for both the 1971 and the 1981 based series were identified and the degree of compatability of the two series was stated. Link factors,

de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activité proviennent de la matrice "production" du tableau d'entrées-sorties de 1981, laquelle à son tour est établie à partir des valeurs de 1981 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux successivement plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^{i}$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

Σ_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Données historiques

L'agrégation par industries basée 1981 = 100 des produits élémentaires se rattache directement aux indices des prix de vente dans l'industrie 1971 = 100, qui existent pour la période 1956-1985. La note aux utilisateurs parue dans le numéro de septembre 1985 de la publication n° 62-011 au catalogue *Indices des prix de l'industrie* identifiait la série équivalente la plus proche pour les séries basées sur 1971 et 1981, ainsi que le degré de comparabilité. Les facteurs de raccordement, calculés à partir de

derived from the relationship of the two series in December 1985, will also be published in the January issue of Catalogue 62-011. These link factors will not be revised. Users can obtain a continuous series on a 1971 = 100 base by consulting the July 1984 and the December 1985 issues of Catalogue 62-011 or by retrieving the data from CANSIM.

Reference Document

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described as are index calculation and aggregation procedures. The relationship of the new series to its Industry Selling Price predecessor is given. Comments on index use are provided.

In the tables will be found weighting patterns for both aggregations of commodities and commodities into commodity groupings. Descriptions of the characteristics of the elemental indexes are provided. A listing is provided of nearest equivalent series in the 1981 = 100 series as they relate to the 1971 = 100 Industry Selling Price Indexes.

A glossary of terms is also provided.

la relation des deux séries en décembre 1985, paraîtront également dans le numéro de janvier de la publication n^{O} 62-011 au catalogue. Ces facteurs ne seront pas révisés. Les utilisateurs peuvent obtenir une série continue sur la base 1971 = 100 en consultant le numéro de iuillet 1984 et celui de décembre 1985 de la publication n^{O} 62-011 au catalogue, ou en extrayant les données de CANSIM.

Document de référence

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices. Les relations entre la nouvelle série et l'ancienne série des prix de vente dans l'industrie qui l'avait précédée s'y trouvent également. La publication contient des commentaires sur l'utilisation des indices.

Les tableaux contiennent les schémas de pondération à la fois pour les agrégats de produits et de produits en groupes. Y figurent également une description des caractéristiques des indices élémentaires ainsi qu'une liste des séries équivalentes les plus proches de la série 1981 = 100, dans la mesure où elles se rapportent aux Indices des prix de vente dans l'industrie 1971 = 100.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1981 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1981 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 1980.

These indexes are, to a large extent, a continuation of the previously published Raw Materials Price Indexes, 1977 = 100. The new, 1981 = 100 indexes can be linked with their equivalents in the 1977 = 100 series using the link factors which were released in the January 1986 issue and repeated in the February and March issues of this publication. Apart from the change in time and weight base, there have been some minor changes in the structure and methodology. Thus, the previous major group Textiles has been discontinued and the commodities forming it re-distributed: cotton is now a part of vegetable products and wool is a part of animal and animal products. Man-made fabrics, which did not satisfy the definition of raw materials, have been excluded from the revised index. At the same time, both the commodity samples and the samples of respondents have been revised and updated to give more reliable estimates of price movement. As a consequence some additional commodity detail is now available.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at

INDICES DES PRIX DES MATIÈRES BRUTES (1981 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matière brute" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1981, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 1980 de CANSIM.

Ces indices constituent, dans une large mesure, la suite des Indices des prix des matières brutes, 1977 = 100, précédemment publiés. Les nouvelles séries basées 1981 = 100 peuvent être raccordées à leurs séries équivalentes basées 1977 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de janvier 1986, et répétés dans les numéros de février et de mars 1986, de la présente publication. Outre le changement dans la période de pondération et de référence, de légères modifications ont été apportées à la structure et à la méthodologie. Ainsi, l'ancienne composante principale nommée Matières textiles a été dissoute, et les produits qui en faisaient partie ont été reclassifiés comme suit: le coton se retrouve maintenant avec les substances végétales, et la laine, avec les animaux et substances animales. Ne satisfaisant pas à la définition de matières brutes, les fibres synthétiques ont été exclues du nouvel indice. Par ailleurs, les échantillons à la fois des produits et des répondants ont été révisés et mis à jour afin d'obtenir des estimations plus fiables des mouvements de prix. En conséquence, plus de détails sont maintenant disponibles pour certains produits.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix d'autres sources bien connues soient utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont

the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1981 Input/Output tables which provide values at purchasers prices of commodities purchased as intermeditate inputs. These weights are shown in the accompanying table.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1981, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires. Ces pondérations sont présentées au tableau ci-joint.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \quad P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1981;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1981;

$P_{t/o}^{i}$ est l'indice de prix pour l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

$\sum_i$ indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in 1981 or a more recent year. In a few instances where data are not available, the price quotations are equally weighted.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone 613-990-9607.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché en 1981 ou pour une année plus récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6, ou téléphonez au 613-990-9607.

RAW MATERIALS PRICE INDEX, 1981 = 100, WEIGHTING DIAGRAM

INDICE DES PRIX DES MATIERES BRUTES, 1981 = 100, SCHÉMA DE PONDÉRATION

Index - Indice	Weights - Pondérations	
	Total Ensemble	Major group Groupe majeur
	percentage - pourcentage	
Raw materials - Total - Ensemble des matières brutes	100.0	
Total excluding mineral fuels - Ensemble sauf combustibles minéraux	54.74	
Vegetable products – Substances végétales	**10.40**	**100.0**
Fresh fruits - Fruits frais	0.49	4.79
Grains - Céréales	3.47	33.39
Oilseeds - Oléagineux	1.56	15.01
Fresh vegetables - Légumes frais	1.07	10.37
Tobacco, raw - Tabac, en feuilles	0.76	7.35
Sugar, unrefined - Sucre, non raffiné	1.23	11.85
Natural rubber & allied gums - Caoutchouc et gommes analogues, naturels	0.28	2.70
Cocoa, coffee & tea - Cacao, café et thé	1.02	9.83
Hay & forage - Foin et fourage	0.03	0.37
Vegetable textile fibres - Fibres textiles d'origine végétale	0.44	4.28
Animal & animal products – Animaux et substances animales	**20.44**	**100.0**
Furs, hides & skins - Fourrures, cuirs & peaux	0.80	3.93

Sheep & lambs - Moutons et agneaux	0.03	0.19
Hogs - Swine, nes. - Porcs destinés à l'abbatage	3.59	17.57
Poultry - Volaille	1.65	8.10
Milk, whole, unprocessed - Lait, entier, non transformé	5.69	27.83
Eggs in the shell - Oeufs en coquille	0.22	1.11
Fish - Poisson	1.63	8.01
Animal textile fibres - Fibres textiles d'origine animale	0.10	0.53
Wood – Bois	**8.07**	**100.0**
Logs and bolts - Billes et billots	4.93	61.06
Pulpwood - Bois à pâte	3.14	38.93
Ferrous materials – Matières ferreuses	**2.30**	**100.0**
Iron ore - Minerais de fer	1.53	66.17
Iron & steel scrap - Déchets de fer et d'acier	0.78	33.83
Non ferrous metals – Métaux non ferreux	**11.13**	**100.0**
Copper concentrates - Concentrés de cuivre	2.83	25.43
Lead concentrates - Concentrés de plomb	0.91	8.25
Nickel concentrates - Concentrés de nickel	0.42	3.85
Zinc concentrates - Concentrés de zinc	0.63	5.74
Radio-actives concentrates - Concentrés radio-actifs	1.18	10.68
Precious metals - Métaux précieux	1.92	17.27
Other base metals - Autres métaux non ferreux	2.65	23.83
Non-ferrous scrap - Déchets de métaux non ferreux	0.54	4.91
Non-metallic minerals – Minéraux non métalliques	**2.38**	**100.0**
Sulphur - Soufre	0.16	6.78
Asbestos fibres - Fibres d'amiante	0.03	1.45
Clays and other crude refractory - Argile & autres matières réfractaires brutes	0.21	8.82
Sand and gravel - Sable et gravier	0.41	17.36
Stone - Pierre	0.68	28.70
Other crude minerals - Autres minéraux bruts	0.87	36.85
Mineral fuels – Combustibles minéraux	**45.25**	**100.0**
Coal (thermal) - Charbon (thermique)	3.48	7.70
Crude mineral oil - Huiles minérales brutes	38.38	84.80
Natural gas - Gaz naturel	3.39	7.49

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1981 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1981 as a time reference base and the weights used are 1981 company revenues from sales of electricty, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the Industry Product Price Indexes, 1981 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 1979. Indexes for the current year and the previous year are subject to revision.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1981 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnés d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1981, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1981, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1981 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 1979. Les indices de la présente année et de l'année précédente sont sujets à révision.

in the most comprehensive source of coroporate financial data available.

Based on tax information from over 500,000 Canadian Corporations **Corporation Financial Statistics** provides tables of detailed balance sheets, income statements and retained earnings for 182 industry groups.

An essential tool which will help you:

- identify industry sectors with the best rates of return
- compare the financial position of competing industries
- monitor and research the Canadian economy and business world.

Corporation Financial Statistics #61–207, bilingual; $50 in Canada, $51.50 other countries.

dans une des sources d'information les plus détaillées sur les finances des sociétés.

Basé sur l'information fiscale de plus de 500,000 entreprises canadiennes, **Statistiques financières des sociétés** offre des tableaux explicatifs sur les bilans, les déclarations de revenus et les bénéfices non répartis de quelque 182 groupes industriels.

C'est un outil essentiel qui vous aidera à:

- identifier le secteur industriel ayant les meilleurs taux de revenus
- comparer la situation financière des industries en concurrence
- scruter l'économie canadienne et le monde des affaires.

Statistiques financières des sociétés 61–207, bilingue; $50 au Canada, $51.50 dans les autres pays.

What does the average family do with $30,000?

In 1984 the average family in Canada had a disposable income of $30,000. **Income after Tax, Distribution by Size in Canada, 1984** classifies the after-tax income of Canadian families and individuals. Income data are given by size of income, region, source of income, family size, number of children, age and sex of the family head, and other characteristics.

Use this report to examine how different policies might affect different socio-economic groups. Study problems of the poor and elderly. Get an accurate reading of the purchasing power of Canadians.

Que fait une famille type avec $30,000?

En 1984, le revenu disponible d'une famille canadienne type était de $30,000. La publication **Revenu après impôt, répartition selon la taille du revenu au Canada, 1984** indique le revenu après impôt des familles et des particuliers canadiens. Les données sur le revenu sont présentées selon la taille du revenu, la région, la source de revenu, la taille de la famille, le nombre d'enfants, l'âge et le sexe du soutien de famille et d'autres caractéristiques.

Ce rapport permet de déterminer l'incidence que peuvent avoir différentes politiques sur divers groupes socio-économiques. Il permet aussi d'étudier les problèmes que rencontrent les personnes pauvres et les personnes âgées et d'obtenir des données précises sur le pouvoir d'achat des Canadiens.

Des données de dernière heure comprenant toutes les séries de statistiques les plus importantes qui ont été diffusées deux semaines avant la date de publication du bulletin.

La situation économique actuelle

Le rendement de l'économie au cours du mois, présenté en bref, comportant une analyse de l'emploi, de la productivité, de la demande et des principaux indicateurs précurseurs des tendances de l'activité économique.

Des notes techniques et statistiques

Des notes portant sur les nouveaux programmes statistiques ou les programmes révisés et sur les progrès en matière de méthodologie propres à Statistique Canada.

Les principaux événements économiques

Des événements internationaux et nationaux influençant l'économie canadienne, présentés en ordre chronologique.

Des études spéciales

Une recherche approfondie des affaires et des questions d'actualité liées à l'économie.

Un aperçu statistique

Des tableaux, des graphiques et des diagrammes englobant les statistiques des comptes nationaux, de la productivité, de la demande, du commerce, de l'emploi, des marchés financiers, etc.

ET PLUS ENCORE...

Une analyse régionale

Des ventilations par province d'indicateurs économiques stratégiques.

Un survol de l'économie internationale

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.
